## IWES

### Multi~Interdimensional Water~Energizing System IWES

Today the well-known osmosis and filter systems are available for purchase, which are predominant on the market at the moment. Some people believe, when they filter their water first and then treat it with some crystals, they will get sufficiently healthy water.

But this is not true. Water that has been filtered or treated with osmosis will neither become sufficiently energized afterwards, nor **valu(e)**able for the body. The tap water today contains only 2,5% right-spinning energy, but man needs approximately 5% for his daily nutrition. Neither by filtering now through osmosis will the right-spinning energy get enhanced.

Now the issue itself: **Energizing**

When you treat water with osmosis or filter it before drinking, nothing will be left in the water which constitutes the natural condition. **You could say that the result is „dead or empty“ water.** If you now try to energize it, you will not get alive water from dead water again. The same would happen to us as complete beings:

1. With filtering you do not erase the „memory“ (information) of the water
2. With filtering you will not erase the partial left-spin of the water
3. With filtering you will not achieve a change in crystallization (generating of clusters)
4. All information of toxins, heavy metals, hormones etc. are still contained in the water multidimensionally, for our body even more dimensions exist

**But these are important characteristics to get alive water.**

If you now enhance the energy of the water with **crystals**, this may work partially, but you will also intensify the negative characteristics and in addition to dead water you will now get an increase of the left-spin, of the memory and last but not least of the faulty crystallization as well. Crystals are a philosophy for themselves, which no one really knows and understands. From our experience one should be well versed and be capable of communicating with them. They are individual like human beings and every crystal has different needs for their clearing. From our point of view they belong back into earth after direct contact with human beings or water and should not be displayed anywhere. In the past crystals have been used to absorb dark energies and who can guarantee which crystals are free from these? Also it is quite common that merchants wrap the crystals in newspaper. They are getting programmed thereby.

Frequently asked questions about energized water are also: how strong is the information and how long does it last? Some also believe, that the water becomes better by incantation or the flower of life and others have a mechanical swirl in their household. This can surely help short term, but after hours up to 2-3 days maximum,

the water collapses into it's former condition again, also within the body. Our IWES energizing system sets the water back to it's natural energetic condition. Only like this the body will be supplied with the valu(e)able energies and natural information, that it needs daily and urgently. The cells of our physical body can be renewed, regenerated and newly programmed. Our IWES will help you with this...all returns to the original matrix, multidimensional up to the 24.dimension.

Prevention becomes more and more important to maintain health in daily life. Our way of living is increasingly characterized by unhealthy incidents. This happens in the place of work and also at home and is a result of the modern eating habits as well as our modern technology. Because of the industrialization and the resulting exploitation of earth and men many issues have been decided to the disadvantage of health in the last decades. Therefore it has become even more important to act preventively.

We have developed a simple but ingenious system, which is affordable and lastingly provides effective prevention without side effects. You may ask yourself, what do I have to do for it? You only have to drink between 1-2 liter energized water daily preferably at room temperature. This sounds simply, but will I be able to really bring something about? The human body consist of 80% of water minimum. Therefore good and energy-rich water is so important for the daily nutrition. Our contemporary drinking mainly comes from the tap or is bought in the supermarket. For the tap water laws regulating cleanliness, the drinking water act, applies. It regulates clearly which molecules (over 2.000 substances of content are known by now) are permitted to be contained and which ones are prohibited to keep the water clean and healthy. But is this really true? Also for the water from the supermarket laws apply, that are made to ensure that the bottled water, mostly carbonated is supposedly good. People nowadays spend a lot of money to get good water. For this purpose specially treated water is offered that costs a multiple amount of normal water. One should bring into awareness that the bottled water has a best before date of minimum 2 years mostly. By which "ingredients/ procedures" has it been preserved? There is no legal regulation for this preservation.

Some already more conscious people buy specialized filter systems, that allegedly remove many harmful substances (more than 2000 are known) from the water? Accumulated in the filter these substances then transfer the complete information to the running through water as long as one does not change the filter every 3 days. Meanwhile the market is full of all kinds of waters and technical equipment, that is supposed to improve the water quality. The only problem is that water is an hidden memory of information.

As a layperson one can only decide whether water is dimmish or clean and clear. Besides one can decide if it tastes good or not when drinking. But when one goes deeper into the topic, one can see that there are no distinct or standardized parameters for the production of drinking water, except for the respective drinking water acts. Fact is, that water has been highly underestimated until now. Even experts and doctors have not established distinct guidelines for nutrition up to now, because even these people are unable to cope with advice about the „right“ water.

Even though we consist of more than 70% of water and therefore water is the most important component of our bodies.

So whom can you ask, when nobody has given a clear statement about high quality water up to now? Hence we would like suggest a few guidelines:

- Water is an electromagnetic carrier of energy. The amount of energy is important for the wellbeing and health of humans. Every human needs at least 6500 Bovis-units daily to stay healthy. Today's drinking water contains only about 2500 energy units.
- Water is a carrier of different additives like calcium carbonate, hormones, residues of pharmaceuticals, chlorine, pesticides, nitrate, heavy metals, which are partially absorbed from the soil during percolation and are just revolved in the water works. The bigger part remains in the drinking water and is taken in with consumption.
- Water is building clusters (ice crystals), that can give evidence about the purity and quality when you freeze it. The worse the building of crystals, the worse the quality. (jap. Wissenschaftler Dr. Masaru Emoto)
- Water has a memory, it memorizes information like a harddrive and keeps it until it is deleted or programmed otherwise. This memory is the main problem with contaminated water. Even if you filter the water and get allegedly clean water, the information of bad water is still there and when you drink it this information will be memorized in the brain and all cells.

From our point of view these are roughly the most important parameters and all technical equipment or qualities of water should be measured by these criteria. Boiling the water is the easiest method to make water drinkable. Through boiling some germs and bacteria will be destroyed, but not the information that is memorized by the water. Besides the energy will not be raised, it rather decreases.

By using very costly filter equipment you can free the water from toxins and germs, but the information of these substances, which have been contained in the water before, will not be erased (water is a vast memory of information). Also the lack of energy will not be raised by filtering. The water bought in bottles is neither supplied with energy, nor the contained harmful substances have been diverted. The carbonic acid merely defends more bacteria, because it actually has a slightly poisonous effect and causes hyperacidity of the body as well. The harmful information remains within. The plastic bottle releases some additional plasticizer (chemicals) into the water.

The water from the tap is perhaps filtered, but not supplied with energy sufficiently, respectively the information remains. With installation of the IWES system we provide the following benefits:

- The water is enriched with energy, which makes up to 80% of the maximum amount depending on the applied system.
- The negative information contained in tap water is erased and completely re-programmed, so it can re-establish its natural condition (100% right-spin)
- The additives like calcium carbonate, germs and bacteria and toxins are transformed by the system and „informatively upgraded“ for example calcium carbonate becomes calcium, left-spinning germs and bacteria are neutralized, all „positive“ germs and bacteria are sustained.

- The building of clusters (pearling) is Die Clusterbildung (Perlung) is outstanding and correlates with drinking water of the highest quality and excellence.
- This means, you get very good quality of water from your tap and you can draw your drinking water for free every day. It tastes sweet and energized, protects your house in a radius of 500m and therefore reduces all harmful radiation (Mobile phone, WiFi etc.).
- We can now look back on many years of satisfied customers, some are so happy to claim they have discovered a mountain well within their house and call it their own crystal water...
- There are no additional costs for maintenance. The facility works maintenance-free and can be installed anywhere by anyone without any cost for installation. The energies Die Energien adjust **dynamically** to the continuously raising frequencies of the earth.

All water (as well as air and matter) is energized with the IWES system.

Due to the spiritual-emotional programming, energy from the grid-lines/ energy fields of the earth is continuously „radiates“ into the water by the IWES bar and therefore energized according to the programming. Also IWES is a dynamic system which permanently adjusts to the earth and it's magnetic field. This means IWES is intelligent. There are rarely similar systems on the market and if so, they are available at very high cost only. Our aim is that everyone can afford this precious water, to become a gift for the environment and the new earth. Because when IWES-wastewater runs back into the waterworks or to nature, it take effect like a high potency right-spin and here also works deep into the origin of the cells.

All is energy~frequency. Some have a higher~faster vibration, matter has a lower~more slow vibration, but everything vibrates. Even our physical body has an energy field (aura), that is the source of matter & thus influences matter (from our point of view it even creates matter).

By starting with the energy field of matter (the origin), one has the chance to have an impact on matter and to change it.

**Example:** A molecule of lead in the water. Even if you extract it by filtering, the information of lead remains within the water and permeates the body. But if the harmful information is erased, respectively transcribed from the molecule of lead, the molecule becomes an empty shell...

You can recognize the energized water by a build up of generating pearls~clusters (depending on the location and the present energy field) within a few hours up to several months, even if the water does not actually touch the IWES bar itself.

This water-energizing~programming gives the cells of the body the chance to re-program themselves (we consist of more than 70% of water). Hence all cells receive the „primordial energy“ that they truly need.

The **IWES**-system consists of an **approximately 15 cm long**, thumb thick bar, which is filled with specifically treated crystals, by months-long groundwork. Crystals have the characteristic to save information (like computers = silicium crystals/chips, that save the information).

The saving~programming~charging is done by Jenny Solaria herself. Thus you only have to fix the bar in direction of water flow to the water pipe as following.

To install the IWES-bar you fix it according to the labeled direction of water flow from the outside on the water pipe (with clear tape or white cable tie), the whole length has to lie against the pipe directly.

Alternatively you can also use the shower tube if you are living in a flat (wrap the IWES safe from water!!!). We recommend a minimum of 0,5 m length of tube behind

the IWES~bar. Only like this the right-spin can build up. Our energizing systems for the highest dimensions are hand-made and sealed.

All energy bars are sealed and are self-sustainable in their recharge process after delivery. As long as the electromagnetic field of the earth exists, the crystals keep recharging themselves.

**IWES** = energetic CRYSTALWATER-system for the water pipe, serves the increasing of the energetic frequency within a radius of up to 500m & clears the chakras in the highest dimensions up to the 24th dimension (photo on the left shows a clear pearling in the bottle after the use of IWES for several months).

**HARES** = HouseClearingEnergizingSystem, harmonizer, ghostbuster, eliminating interference from black magic, dark souls, astral beings, curses, tectonic destructions of the earth, underground watercourses etc. & harmonizes present vibrations of flurry & interfering fields within a radius of 100m (has to be placed in the centre of the house with the arrow pointing upwards)

**STROMES** = energetic electricity-neutralizing-system, evens out all polarities within a radius of 100m, releases electric smog, energizes the electric power, cleanses the electric power and frees it from all programmings (to be installed in direction of flow of the incoming power supply line from the outside with tape or placed inside the fuse box in upright position)

**PERSONES** = Your personal energizing system (Transformator) has to be carried on the body. It is programmed to your soul frequency incl. a personal programming if you so desire (particularly beneficial in healing processes). It provides protection outside of the house. It transforms all polarized energy (black magic, deceased ones, extraterrestrial beings, curses, fungi, parasites, energy vampires etc.), resets the cell water of the carrier back into it's primordial condition, cleanses clothing energetically, activates heart energy and takes effect in harmonization of your awareness in your daily routine. With your order declaration of all your names, date and place of birth is required.

## MOBILES

This free energy system is handmade thoroughly by the International center for soul nutrition like all other systems. It consists of 1 energy bar, wrapped with a copper spiral and is designed for attachment to the car's glass pane with the tip of the spiral pointing upwards. Attach as upright as possible with a suction cup, keep safe from humidity.

MOBILES has been developed with the intention of being able to drive your car more relaxed and protected energetically. A lot of electromagnetic pollution is generated

while driving a car, which stresses the balance of our energy system tremendously. This is due to our body's own energy field being a co-current flow, which can be disturbed by alternating currents. This can lead to exhaustion quickly. Also the nuclear radiation on the earth is higher than ever before. Thus one is afflicted much more by driving a car for kilometers than by walking. Besides energy remains in its place for a long time, hence when driving a car you pass through masses of people with all kinds of energy fields, which possibly charge themselves from your energy or get attached to you. From long distance driving, one falls into the alpha-status, recognizable by tiredness and exhaustion. Our subconsciousness can now be reprogrammed more easily and an opening of the programmings can result from HAARP or ELF-waves. MOBILES protects from this subconscious programming. Because all energy systems made by InLiNa activate dimensional gateways, we can implement a change of the morphogenetic fields by car-driving. Nonduality gets activated and becomes operant on the streets sustainably, a lasting brush for the streets. The Bovis-units, which can be achieved by the installation of MOBILES add up to several millions, that will increase dynamically with the raising frequency of the earth. The impact of these highly energetic MOBILES-systems reaches to a radius of more than 1 km:

- reduce of fuel consumption
- harmonization of the car journey, stabilization of the car occupant's frequencies
- dissolving of artificial grey cloud covers to some extent (caused by chemtrails)
- transformation of WiFi~ELF-waves~mobile phone radiation through raise of frequency
- neutralization of HAARP-waves. HAARP information gets partially transformed/ overlaid with a high frequency field of force
- energetic clearing of streets, dissolving of fragments of foreign souls on the streets
- shielding of black magic, cleansing of the astral plane, sealing
- Equalizing of all electric, magnetic, electromagnetic, gravitational, electro-gravitational polarities, right-spinning energetic cleansing of matter
- reduction of nuclear activity within a radius of up to 1 km

## **BLITZI**

BLITZI has been developed with the intention to be freed from chemtrails and their enormous strain for our health. Chemtrails are spreading aluminiumhydroxide, salts of barium, strontium, freeze-dried DNA, streptococci, nano-particles(with varying fillings) and even radioactive materials into our atmosphere and environment since the 90s. Therefore the sole dissolution of the condensation trails would not be sufficient. Also the soil, houses, plants etc have to be freed from this pollution sustainably and they have to get energized. Therefore BLITZI has a compendium of

tasks and also sets free energetically also contaminated areas. It consists of 5 single systems.

The Bovis-units (BE), that can be achieved by installing BLITZI-systems, add up to several million BE, and they will dynamically increase with the permanent raise of the earth's frequency. These highly energetic systems have an impact within a radius of more than 10km:

- dissolution of artificial grey cloud covers caused by chemtrails
- neutralisation of WiFi radiation, ELF-waves, Mobile phone radiation  
strains from satellite dishes by elevation of vibration in the area
- neutralization of HAARP waves, HAARP information gets converted through development of a highly energetic force field  
(high vibrations overlay low vibrations)
- opening of a dimensional gateway into the 24th dimension, non-duality
- energetic house- and garden-clearing, liberation of unwanted spirits in the house
- dissolution of grave energies (mass graves, graveyards), liberation of the earth-bound souls
- shielding of black magic
- clearing of the astral plane, sealing of the astral grid, which prevents recharging of lower astral beings, change of resonance
- harmonization of underground watercourses, earth slips, geopathic fields of disturbance get transformed
- harmonization of magnetic grids, Curry grids, Hartmann etc.
- equalization of all electric, magnetic, electromagnetic, gravitational, electrogravitational polarities
- right-spinning, energetic clearing of matter

# IWES

*(multi~interdimensional water-energizing for the requirement of a house of up to 400 m<sup>2</sup> of living space)*

## Advice for correct installation

- Please attach the system, if possible in upright position and the arrow pointing in direction of water flow, directly onto the water pipe behind the water meter. Therefore simple clear tape or white/ clear cable tie is sufficient.

**Generally all other space & water energizing systems, larger crystals, symbols (like the flower of life for example) have to be removed from the house.**

- In a flat we recommend to place the system to the beginning of the shower tube. It has to be wrapped several times with clear foil with no advertising to make it waterproof. Like this the water can still run through the tube for about 0,5m after passing the system and thus generate the right spin. Installation beneath the sink in the kitchen is not advisable (water does not have enough way and most people store their waste or chemicals there)
- Please remove all sieves from the armature, because they cut the water. In case of strong calcification buy new armatures/ shower-heads.
- Please hand-wash your glasses, without dishwashing liquid. The remaining chemicals erase almost all energizing~pearling.
- After installation TEST PEARLING. Therefore fill a few thin glasses with the water and leave them open for about 1-2 hours. You should find a good amount of pearls in the glass, quite often very small ones. Sometimes only after leaving the glasses overnight.
- All dishes can block energetically because of the formerly used chemicals for cleaning, therefore it can happen that the result can only be seen after several weeks, when the water has reprogrammed this matter.
- IWES cleans all pipes. Also chalk can be refined to calcium. One could think it is an increase of chalk debris (but these can only be removed using strong aggressive chemicals)
- IWES refines the crystal structure of the elements within the water, which should finally result in soft and sweet water after max. 6 months. Due to the cyclical raise of earth frequency it can happen that also IWES pearls periodically (one day more/ another day less or sometimes not at all)

- If you don't find pearling in 1-2 subsequent weeks in several thin glasses, please write an email including the address of installation of the system. We will check the location energetically and activate a recharging of IWES from the distance if indicated.

## IWES

*(Water energizing for a house of up to 400 m2 of living space)*

### **Experiences with IWES water**

The water „bubbles“ (generating of clusters in the water) on very comfortably on the back while having a bath, afterwards one is refreshed, relaxed and energized...

My skin is much more tender than it was already before using IWES.

The hands and even the palms feel quite soft.

The contact with the water while washing dishes, hands or face... is very soft and pleasant. The water runs down from the dishes faster.

The bathtub had no mark after the use of brown shampoo and brown hair mask (which had always left a mark).

Also cleaning of the basin, the walls of the shower is much easier - without the use of chemicals.

Cleaning mirrors and windows: when stripping off the water the rubber slides very easily over the smooth surfaces and without leaving stripes! Previously it always jerked and left stripes.

Soft and old carrots became crisp and fruit sweeter after soaking (approximately 1h). There is no need to use sugar anymore (tested on strawberries, raspberries and blueberries). Everything is lovely reprogrammed into divine order (all food should be soaked in IWES water in the sink for about 60 mins before consumption).

Drinking the water is easy, one goes to toilet more often.

The air in the house is clearer and more pleasant, even after long journeys.

The laundry dries faster on the rack and there is no need for fabric softener, the colors are fresh and firm, dark energies that had been attached to the clothes are removed.

The water gets absorbed into the skin immediately and one does not need a towel anymore (like in sacred wells, it dries magically and moisturizes the skin).

Generating of limescale is visible, because calcium carbonate is in the water, but it can be wiped away more easily, removable like sand by light rubbing.

It is more easy to remove also the encrustation in frying pans, quite often just by soaking the pan in IWES water.

A bath of at least 30 mins in IWES water clears all chakras, relieves of headaches and raises the awareness of life. Dipping into the water completely drives off negative energies and thoughts... etc...

Also pets (dogs, cats, horses) love this water excessively...

After several months also the cellar rooms have a more pleasant atmosphere

## Soul frequency globuli

saved in practical globuli...

With your personal soul frequency Globulin you are perfectly equipped for sensitive moments & tests of your every day life, which could blow you away!

Of course your saved soul frequency also supports you to find your way through life & much more...

The impact is tremendous & lasts for quite some time (approximately 48hours). Take your personal soul globule according to your feeling, as soon as you feel a wish to get centered again (max. 3 per day). You can either take them directly or dissolve them in a glass of water and drink them (faster/ more

intense effect). Please have a short relaxation break or meditation break after intake, so that the effect of your soul frequency globuli can take place fully... Because it is your own personal frequency & vibration and produces a tone, the effect of your soul frequency globuli is interdimensional & multidimensional. This means on all levels of YOUR BEING. Very soon you will notice big shifts if you focus your awareness... you will feel more centered and stabilized.

We are ready to make your own personal soul frequency globuli with pleasure. This requires a bit of time, your name (all given names and your family name), your birthday and place of birth.

## PERSONAL REGENERATION GLOBULI (vegan)

to support the re-establishment of your self-healing power

These are manufactured personally and tuned by Jenny Solaria. The indication of your ailment, discomfort, illness or life's issue is required, for example reoccurring throat chakra issues (sore throat), problems with gums, skin affections, personal issues, chronic troubles with health and wellbeing of any kind...

Intake as indicated for soul frequency globuli.

*We point out that our products are only recommendations & they work energetically, through information. They do not substitute a visit to the doctor or naturopath!*

## Energetic being of oneness

In the past many thousands of years the power of symbols has been used deliberately for the optimal flow of energy. On the whole earth in all cultures... The original *Energetic being of oneness* (unpolarized as human being) was known as the „atlantis cross“ after it's polarization. The old egyptian worked with it as the „inheritors of a secret knowledge“. Through the „dark age“ more energetic change has been applied:

**Energetic being of oneness** (unpolarized, neutralizes all energies) —> **Atlantis cross**

(with polarization it was possible to kill and reanimate human beings) —> **Ankh** (legs together, black magic has been performed and it was brought amongst people as a pretended positive key

(only priests used it for themselves) —> **Christ cross** (also head had gone) humans lost their connection to spiritual knowledge & guidance.

With the knowledge & the high frequencies of the new era we now have the chance to re-discover the ancient knowledge within ourselves & to use it for our development. For the carrier the energetic being of oneness, as a neutral amplifier of energy, causes a tremendous increase of his own existing energies. Activation of the heart chakra and thus highest protection of his own energy field. The heart chakra is the neutral chakra, it is always bound to balance all disharmonies of the other chakras. When it is blocked or contains implants, it can result in disease & imbalances. The energetic being of oneness re-activates the heart chakra. After 20.12.2012 (beginning of the change of poles on the earth) the energetic being of oneness has been readjusted to the energies of the new era & is now manufactured without any polarity, hence without positive and negative side. This means, that now everyone can work with neutrality and handle it. The energetic effect is simple, protecting & soothing. One is mostly stabilized within one's center when wearing this symbol of protection on the body & if one has recharged it with neutrality. One could also say it is a carrier of free energy, that we have in the universe more than 95%, so far without being able to make use of it.

The energetic being of oneness has an enormous energetic force. Up to 2 million Bovis-units have been measured (energetic being of oneness gold plated, big). The energy that it absorbs is immediately neutralized. Therefore almost a MUST for healers. His body can fill itself with new energies after a treatment, which results in a much faster raise of his own frequency & therefore he is cleansed and protected...

Of all tools known so far, the energetic being of oneness provides the highest level of protection that can be imagined in this highly polarized world. It builds up a neutral energy field, which strengthens & reinforces the contact with your highest levels of being. Through this an intensification of all your ethereally skills can take place. The energetic being of oneness made of pure silver is for the protection of your physical body, the gold-coated ones are serving for the energetic bodies and open these. Ideal for the intensification of your energetic work.

All energetic beings of oneness are cleansed, charged with neutrality and sealed before dispatching by Jenny Solaria. With the big gold-coated ones you will receive a short instruction of how to work with them and cleanse them.

Your very personal  
**SoulGuardianCrystal**

This very powerful and effective ring of crystal with a diameter of 3 cm is a very particular tool of protection for your soul within the body.

Carried in the right place (Thymus chakra), it activates the entry canal and seat of your soul. One could say, it sends your own innate soul frequency into all your chakras and thus into your consciousness on all levels.

Potential adhering beings or entities, that have nourished themselves of your energy field, are disturbed continuously and made incapable of action with a very high frequency. They become ensouled with love & gratitude through your eternal and infinite consciousness. Through this you get a Strong protection for all your chakras and can live your life's purpose with more determination. This crystal amplifies your feelings and the voice of your soul. This voice only speaks to you through intuition, because it vibrates in a frequency that is beyond polarity of any kind. Start trusting your feelings and yourself deep within through carrying this soul guardian. Your soul will thereby feel at home within you again, you will simply feel more at HOME.

Of course this crystal is not supposed to be touched by anyone apart from yourself. It can be placed in the sun or put into IWES-water when you have the feeling it gets dim and all that it has taken off you gets neutralized. The crystal connects with your energy field and the frequency of your soul will be activated when you wear it. You could imagine a very bright ray of light pouring out of the crystal, which builds up a kind of protecting shell around your aura. The SoulGuardian Crystal is also highly recommended for children or enfeebled persons, because their aura is not completely closed and gets strengthened again by wearing the SoulGuardian. Also all cells on all levels get the information and keep on radiating your soul frequency into their environment, the chakras even after wearing the crystal.

Because it is your personal frequency & vibration which produces a tone, the effect of the SoulGuardian is interdimensional & multidimensional, this means on all levels of YOUR BEING. When you set your awareness to it, you will soon notice bigger changes... With great pleasure we manufacture your own personal SoulGuardian Crystal for you. This requires a bit of time, your name (all given names and your family name), your birthday and place of birth. For ordering information and current prices see actual price list...

**Jenny Solaria's CD range**  
**Vol. 1 Become one with your body, mind & soul**

Our mind knows different states of awareness. The waking state is known as beta-state (15-30 Hz). The alpha-state (8-14 Hz) however is a state of relaxed alertness.

During the trance - deep relaxation the eyes are closed & mental images are created. I speak with my trance-voice, directly from my soul - in pure love.

Because in deeper states of awareness we have direct access to our subconscious mind, we can anchor this pure love within us successfully. When we have reached a state of trance - deep relaxation, we can invoke images & feelings, that can be anchored newly. The stronger the identification with these images & feelings, the deeper they can get anchored. One's own changes of awareness that are achieved through the trance - deep relaxation start having effects in the subconscious mind right away. Outside changes will become visible when the intensity exceeds the old existing beliefs & thereby transforms them. I invite you sincerely to a journey into your heart.

### **Vol. 2 Open yourself for the infinity within you**

Let yourself be guided silently through the depth of your own primary energy by a live-channeling. Jenny Solaria walks you through your true being in trance by a short meditation with a very high frequency. Make use of the tools of the new era, as for example daily ONENESS~breathing. It is a wonderful support to free your primary energy from polarized energies and its effects. Learn to use the

ONENESS~breathing also on your own as recommended by Jenny Solaria in her 3 day soul nutrition seminars. This CD is a preparation & intensification of energies for the new 5th dimensional era in the human body.

**Instruction for ONENESS~breathing:**

We put our tongue to the palate and visualize a bright light from within a ball above the head down into the belly. With exhalation put down your tongue and direct the stream of light down into your feet and back through the aura into the ball of light!

We start with 7 cycles:

1. cycle: inhale (7) – hold the breath (1) – exhale (7) - hold the breath (1) –
2. cycle: inhale (7) – hold the breath (1) – exhale (7) - hold the breath (1) –
3. cycle: inhale (7) – hold the breath (1) – exhale (7) - hold the breath (1) –
4. cycle: inhale (7) – hold the breath (1) – exhale (7) - hold the breath (1) – and so on.

Now we complete the breathing cycle to 14 breaths:

During the next 7 cycles we form mudras with our fingers and visualize bright light only through the Prana channel.

We start with putting the thumb and the tip of index finger of each hand together... then tip of middle finger + thumb...etc. until we come back to the index finger with the breath:

8. cycle: inhale (7) – hold the breath (7) – exhale (7) - hold the breath (1) –
9. cycle: inhale (7) – hold the breath (7) – exhale (7) - hold the breath (1) –
10. cycle: inhale (7) – hold the breath (7) – exhale (7) - hold the breath (1) –
11. cycle: inhale (7) – hold the breath (7) – exhale (7) - hold the breath (1) – and so on.

With the 15. breath we put all our fingers together to a mudra. Thumb + index finger + middle finger etc. are put together. During inhalation we visualize how golden + bright light streams into the Prana channel from above and below at the same time (like lightnings). During exhalation we bundle this light to a ball in the solar plexus. This gets bigger and bigger with every exhalation... During the 16th breath we lift this golden ball of light with a long inhalation up into our heart chakra and then exhale until this light enwraps our complete body. The stream of energy has been released now for at least 48 hours. This breathing technique will be explained in more detail in the soul nutrition seminars.

**Vol. 3 Find the primordial love within yourself**

Let yourself be guided silently through the depth of your own divinity by a live-channeling. Jenny Solaria leads you in Trance through your hole being in a few short meditations with a very high frequency. The planetary journey clears all your chakras down into the deepest dimensions. This interdimensional journey is very profound for your consciousness.

A quite special highlight is the transmission of your soul frequency, which can lead to an intense mergence with your primary frequency~energy when listened to the meditation regularly. Alongside this Jenny Solaria kann channel your soul frequency for you and transmit it to your own personal soul globuli. Make use of this CD as a preparation and intensification for the upcoming energies of the new 5 dimensional era in the human body.

Jenny Solaria´s CDs are just one of many tools and you are welcome to read up on the other channeled products.

Experience yourself in your own infinite wideness and let yourself float with Jenny Solaria´s affectionate trance voice. She leads you high-energetically and gently into the deepest & highest levels of your being.

Your consciousness can liberate itself wonderfully of the mental reality with these high-frequency clearing meditations. Feel how your heart and soul open up and you are guided caringly into your primary frequency.

Jenny Solaria recommends to listen to the complete CD at once, because the high energies can be released within you more intensely and an inter~ & multidimensional reprogramming can begin.

You can make a very intense experience, if you listen to the CD at least once daily for 7 weeks.

#### **Vol 4. Self-empowerment**

This CD only contains intentions to help you to empower yourself. Jenny Solaria has created this CD for all participants of the seminars „spiritual-emotional healing“ („Re-activating the power of self healing in the 5th dimension“) & „soul nutrition within 3 days“.

As also in her seminars she speaks the intentions & afterwards you can speak out the intentions loudly for yourself. Also make use of this CD to become more confident in handling of intentions of the new era.

We recommend to speak these intentions daily for at least one month. You will feel how everything gets implemented more & more and how you obtain more freedom in the process of your self-empowerment.

Fittingly with CD Vol. 4 & 5 for all graduates of the spiritual emotional healing (part III) we have the booklet I with more intensive intentions.

### **Vol. 5 Intentions for our ONENESS**

This CD contains a meditation for spinal alignment as well as intentions to help out earth and our Oneness. Jenny Solaria has created this CD for all participants of the seminars „spiritual-emotional healing“ („Re-activating the power of self healing in the 5th dimension“) & „soul nutrition within 3 days“.

As also in her seminars she speaks the intentions & afterwards you can speak out the intentions loudly for yourself. Also make use of this CD to become more confident in handling of intentions of the new era.

We recommend to speak these intentions daily for at least one month. You will feel how everything implements more & more and how you obtain more freedom in the process of your self-empowerment. It is also advisable to phrase & speak your own intentions more and more.

Fittingly with CD Vol. 4 & 5 for all graduates of the spiritual emotional healing (part III) we have the booklet I with more intensive intentions.

## Source of primordial consciousness

When you go to bed at night and you feel you need to be recharged with energy, then you can ask the source of primordial consciousness for it. It is capable of charging you and your body with the consciousness of the source, replenish you and even communicate with you.

You just have to address your intention to it, to reconnect you with the Source of primordial consciousness on all levels and to recharge you there and it will happen. It is kind of a gateway to the primary soul and can only perform this kind of work for you.

This crystal source has agreed to build up a force field for your personal astral body to support you and our ONENESS. It gets programmed by Jenny Solaria with your 13 string DNA/ RNA and therefore with your blueprint as well as with the primary matrix of our consciousness. These crystals are in part more than 200.000 years old and can feed back our DNA, respectively remind it through waves of frequency. These crystals get unblocked, charged, cleansed and sealed by Jenny Solaria before they are capable of back coupling.

If you put this source on your bedside table at night it affects your DNA as follows:

- protection from spacecrafts~kidnapping of the astral body through raise of frequency
- closing down of all negative channels of your astral body, protective sphere of 100m
- recreation of your astral body on all levels of your being
- releasing of curses from your DNA/ RNA
- erasing of many astral implants, programmings, black magical chips
- activation of your primary 13 string DNA and more
- uniting of your masculine and feminine energy bodies on the astral level
- harmonization of all your chakras, activation of your chakras
- resequenced photons (matrix holograms) are neutralized within in the area of sleeping
- creation of a highly energetic force field, interference elimination of grids in the area of sleeping

- cleansing of the pineal gland over night, charging of the pineal gland & spleen chakras
- retrieving of your energy bodies
- overlaying of leylines, protection from negative astral journeys/ dreams etc.

- unblocking of your spine
- cleansing of negative astral portals in your DNA/ RNA etc.

There is one thing you are not supposed to do at all, which is touching it with your hand! It always has to be wrapped in a piece of cotton or linen cloth during transportation.

## **soul nutrition process within 3 days (Light nutrition)**

Seminar facilitator: Jenny Solaria

The framework of this highly vibrational seminar has been channeled by Jenny Solaria in 2011, because the soul nutrition process is very important for the current era! The contents of the seminar is adjusted to the particularly gathered group by actual live channelings within the group.

Adapted to the current energy, the soul nutrition process can be implemented within 72 hours only (formerly 21 days). We recommend drinking lots of energized water.

One learns particular breathing techniques, during the 3 days the cells will be brought back into oneness in the collective consciousness & thus adapted to the constantly rising frequency of the earth. The nery bodies will be cleansed, the chakra frequency gets stabilized, an opening of the heart takes place (as far as each participant allows)...

After 72 hours you will be capable to abstain from all food independently, but you can also return to normal eating~nibbling. Some participants nourish themselves 80% or 90% of primordial love~free energy after the seminar, others started eating again for the first time self-empowered after 21 days - depending on the current status of development of one's consciousness, different „goals“ are possible. Every participant can decide this according to his feeling.

After the seminar every participant is capable of going through this process or continuing on his own at home by application of the learned.

During these 3 days you will drink energized water, but you won't eat a single bite!

- ❖ Please hand over the seminar fee on the first day in cash (begins 10 am/ finishes 5 pm) and you will receive the lecture notes

- ❖ Please wear light coloured, better white clothes during the 3 days of the seminar
- ❖ It is prohibited to bring crystals, gem stones or to record the seminars as well as taking pictures of the participants

## Most important is your own preparation:

As soon as you have decided with your registration to change your way of eating , your soul starts to prepare you (unity of thinking, speech & deed). This means you will most likely have less appetite and the body begins to cleanse itself, especially 3 - 4 days befor the seminar starts. We recommend a cure with black walnut or MMS~CDS approximately 2 weeks before the course starts to eliminate energetic parasites, also a hydro-colonic treatment is very beneficial! Please follow your feelings more and more especially in these days of preparation. Avoid whatever does not feel good & what is not beneficial for you. You are entering into the energy field of Jenny Solaria & thus you a profound energetic preparation & possibly also testings.

### *Please bear in mind after registration:*

- 3 days before the seminar starts your diet should be changed latest into **vegan**.
- 2 days before the course the intestine should be emptied (several enemas & vor Darmgold, MMS~CDS als ChlorVerbindung o.a.). Drink only still water and eat only carbohydrates
- 1 day before the seminar starts you should eat only carbohydrates **until 5 pm**, no more intake of food after that. The intestine should be emptied as far as possible (otherwise another enema).

For all days before the seminar we recommend to drink only still, alive water. Abstain from coffee, tea, alcohol & other luxury foods and stimulants!!! Please do not use any cosmetics, creams or toothpaste during the 72 hours of the course. Otherwise it ends up in metabolism. Only healing earth for external use is tolerated if necessary.

## Seminar-infos

- The seminar starts at 10 am and finishes at 5 pm, on the last day timing may vary (9 am until 4 pm)
- Payment in cash on the first day. Energized water is available sufficiently & free of charge. You will get lecture notes, please bring only writing material.
- It is recommended to bring sufficient warm & comfortable, **light-colored/ white clothing**, particularly socks!!! Furthermore it is recommended to stay overnight at the venue or nearby, to stay within the energy field of the group
- Soul nutrition seminars outside of the center InLiNa in Hungary are organized by the local centers/ organizers. Here you can get information about availability of places in the seminar, traveling instructions, accommodation...If you are interested we will send you an email with the contact details.

- ❖ We ask all participants with a regular medication for previous notification
- ❖ The binding registration is made exclusively in written form by email with our registration form (print, sign, scan or photograph)

### **Cancellation fee (50%) is accepted with the binding registration**

In case of cancellation 50% of the course fee will be invoiced, because with the binding registration you will receive energetic preparation by Jenny Solaria for your process & therefore energetic balance is required.

### **short information about the soul nutrition process:**

In these 3 days all basic principles & knowledge is taught to enable you to convert to soul nutrition independently afterwards. Huge spiritual knowledge is transmitted, which advances the development of consciousness enormously. The cells of the body are getting reprogrammed, the frequency of the cells increases noticeably, breath of oneness is learned & the heart opens again (as far as each individual allows). Strong clearing of the energetic bodies take place. After this seminar this process does not stop though, it rather begins (the end of the seminar is the beginning of your own process of awareness). Now all participants go back into their own energetic environment. And this is real practical test. After the course you can eat anytime (vegan, other foods are mostly refused by the body itself through nausea) and/ or go back to soul nutrition. Most participants are then 50-80% on soul nutrition. Almost all participants abstain from all food for a week after the first 3-day process, others for a month and a few for several month. Also 70 year old participants have managed without food for 8 weeks. Eyes (cataracts) have become much healthier throughout the process, skin & vitality improves, all parasites can leave the body and the biological flora of the gut gets regenerated to the greatest extent (just a few examples)

If you have the feeling to go through this process, it is already the right time for you to sign up. Your soul is already appointed with you.

We are looking forward to meeting you, see you soon. 😊

## **Dimension leap seminars**

Back into your soul! Every seminar is entirely about finding yourself again and feeling who you really are, no matter where you are at and whether you have already done spiritual workshops. It is about making a true dimension leap within yourself! The seminars consist of a kind of group process i.e. workshop, in which every participant will be met wherever he is right now and the whole group works out the dimension leap together. Any open questions will be answered and thus every dimension leap seminar will be unique and individually designed for it's participants. Depending on the issues and consciousness of the participants the topics may access the contents of all other seminars as well as current issues of society. So every

participation on a course will be a consciousness expanding adventure with new insights and perspectives all along. Open yourself for your infiniteness and surrender to everything that may be... Find the primordial love within you and let yourself be touched deeply in your soul... Profound moments are lying ahead of you NOW!

After your binding registration for a course you should decide self-empowered to which extent you already want to apply the following ideal premises to your everyday life: vegan diet, salt-free, caffeine-free, alcohol-free, perfume-free, raw food-free, no jewellery, cosmetics-free, nicotine- and drug- free, free from medication, light-colored or white clothing, IWES-water for physical cleansing and preparation... the daily energetic clearing with intentions (CD) from Jenny Solaria is recommended.
